PROFILE

I'm Lakshya, a developer from Kota, India. I got my first computer in 2020 and haven't stopped building since: small games first, then websites and apps, and now SamLab, which labs and hospitals rely on. I co-founded Sammed Technosol, where I lead engineering, while finishing school in Physics, Chemistry and Maths.

EXPERIENCE

Co-Founder & CTO · Sammed Technosol June 2026 – present
Kota, India

- Lead engineering and architecture across the company's product suite.
- Design offline-first, cloud-synced systems built for uptime.

SELECTED WORK

SamLab samlablis.com · samlab.in
Lab software that runs when the internet doesn't.

- An offline-first system for pathology labs and hospitals, from registration and billing to the final report.
- Connects to lab analyzers, so results reach the report without retyping.
- Used by labs and hospitals across India and internationally.
- Built end to end with my father: the apps, our own backend and cloud sync.

EDUCATION

Disha Delphi Public School

Higher Secondary · Physics, Chemistry, Mathematics
Kota, India · 2015 – 2027

CERTIFICATES

Introduction to Data Science and AI

IIT Madras · CODE School Connect · April 2026
8-week course

Certificate of Appreciation

IIT Madras · CODE School Connect · April 2026
Exceptional work on the course's take-home project

Claude Code in Action

Anthropic · April 2026
Verified certificate

SKILLS

Software architecture
Offline-first & sync systems
Product engineering
Web development
Cross-platform apps (desktop, web, mobile)
UI/UX design
Problem solving
